

## Flatpack2 DC-DC Converter Shelf

## **Overview**

Eliminate the need for two battery systems to support sites with multiple voltage equipment by adding an Eltek Flatpack2 DC-DC Converter Shelf. The easy-to-install Flatpack2 DC-DC Converter Shelf (available in 24V or 48V output voltages) is designed to convert a wide input voltages) is designed to convert a wide input voltages. The system features Eltek's High Efficiency technology that makes it ideal for supporting sites with dual voltage requirements, such as +24V legacy and newer microwave or LTE -48V telecom equipment.

# FLATPACK2 DC-DC CONVERTER SYSTEMS

Doc 370025.DS3 Issue 1.3

#### **APPLICATIONS**

The Eltek Flatpack2 DC-DC Converter System is a high-efficiency power solution with an optimal footprint where space is limited – both in typical racks and some cabinet installations.

The Flatpack2 DC-DC system delivers DC power solutions to telecommunications infrastructures where dual voltage 24/48V or 48/24V are required to power new and legacy equipment from a primary DC voltage source.

#### **PRODUCT DESCRIPTION**

At 18.5" deep, the Flatpack2 DC-DC system is designed for use in 19" ANSI/EIA 310-D racks and cabinets. Extender brackets are included for use in 23" racks.

Powered by Flatpack2 HE DC-DC converter modules, efficiency exceeds 93% at 48V DC output.

**Optional Configurations:** 

- Converter system without controller
- Converter system with Compack
  controller

### **KEY FEATURES**

- COMPACT DESIGN Small overall dimensions are ideal for rack applications.
- REAR ACCESS CONNECTIONS DC loads are rear access. All cabling is horizontal to reduce vertical space.
- HEAT MANAGEMENT Flatpack2 converter module features front-to-back airflow and chassisintegrated heat-sinks, supplementing high-efficiency energy conversion with excellent heat management.
- COST-EFFICIENCY A true plug-and-play system, the Flatpack2 DC-DC Converter reduces both time-to-install and overall costs.
