

# Flatpack S - Intrepid Series

# **1U High Efficiency DC Power System**

### Overview

Increasing network speed demands flexible and expandable DC power solutions. Due to its small size, high efficiency, reliability and wide range of communication, the Flatpack S Intrepid Series Systems are the key for future needs. The shallow depth makes the system suitable for most cabinets and thereby excellent as a replacement unit.

## HIGH-EFFICIENCY DC POWER SYSTEM

Doc 370012.DS3 Issue 2.1

#### **APPLICATIONS**

The Eltek Flatpack S 1U system is a highefficiency power solution with an optimal footprint for applications where space is limited – both in racks and various cabinet installations.

The Flatpack S 1U is a one rack-unit high system that delivers 48V DC power to telecom infrastructure that include: 4G/LTE, FTTX, distributed antenna systems (DAS), microwave broadband, cable broadband, telephony servers and switches and fiber-optics.

### **PRODUCT DESCRIPTION**

The compact size of the system makes it perfect for use in 19" or 23" wide racks and cabinets. Built as a plug-and-play system, the Flatpack S 1U reduces installation time and enables cost-effective deployment.

## **KEY FEATURES**

- COMPACT DESIGN

  Small overall dimensions are ideal for both rack and cabinet applications.
- SIDE / REAR ACCESS CONNECTIONS DC loads and controller connections (alarms, communication, etc.) are front accessible. The AC connections and battery connections are rear.
- DIGITAL CONTROLLER
  The Smartpack S digital controller system provides comprehensive monitoring and regulation by utilizing a variety of specialized data collection.
- HEAT MANAGEMENT
  Flatpack S modules feature front-to-back
  airflow and chassis-integrated heat-sinks,
  supplementing high-efficiency energy
  conversion with excellent heat
  management.
- COST-EFFICIENCY
  A true plug-and-play system, the
  Flatpack S 1U system reduces both timeto-install and overall costs.
